

Managing HIV-AIDS: Intensive 4-day Workshop

(Interactive with cases)

Eligible for 2 credit hours for each day of workshop

29th May; 5th, 12th & 19th June 2011 (all Sundays)
Center of Excellence, 6th floor, JJ Hospital. Mumbai

CMHF

Surveys CME Social Medicine

CM Health Foundation Initiative

The module is tailored for practicing medicos (at community level) and focuses on how to suspect/ diagnose/ confirm & manage HIV infection/ AIDS disease with 20+ cases discussed in a easy to follow and delegate friendly language.

Surveys □ CME □ Social Medicine

Why HIV-AIDS?

An estimated 4 million people in low & middle-income countries were receiving antiretroviral therapy (ART) at the end of 2008, compared to 3 million in 2007 & 400,000 in 2003, according to WHO, UNAIDS & UNICEF.

Statistics, by and large, do not cover those taking treatment from private doctors; case-reporting protocols not rigidly followed, confidentiality being the main reason.

Primary care practitioners (General Practitioners, Medical Consultants) have not had an opportunity to imbibe “**Art & Science of ART**”.

We, at CMHF, identify this felt need and have created a programme that not only teaches but also provides subsequent support, uniform therapy guidelines / MIS and clinic branding.

SCIENTIFIC PROGRAM

29th May 2011. 9. 15 am sharp. Inauguration at hands of Dr S S Kudalkar - Project Director - MDACS

DAY 1: General aspects

- Epidemiology - Dr Alaka Deshpande
- About the virus - **Life cycle** & replication - Dr C H Asrani
